

DELTA DIABLO RECYCLED WATER PROGRAM CUSTOMER'S SELF-MONITORING REPORT

Name/Location of Site:	Monitoring frequency specified in permit:	Customer's Designated RW User Supervisor:
------------------------	---	---

MONITORING DATA

Monitoring Period: *(I.e. Jan-Mar)*

Is recycled water escaping the use area through surface runoff or airborne spray? (If yes, note affected area and estimate volume)	yes	No
Are any odors associated with use of the recycled water? (Note source, characterization and travel distance below.)	yes	No
Is there prolonged ponding of recycled water due to over-irrigation or evidence of mosquito breeding as a result of ponding?	yes	No
Are there any warning signs, labels, or markings identifying recycled water that are missing, illegible, or not visible?	yes	No
Are there leaks or breaks in the irrigation system piping or evidence of plugged, broken, or otherwise faulty irrigation system components?	yes	No
Is recycled water being sprayed directly on people, dwellings, food-handling facilities, or drinking fountains?	yes	No

Explain any "yes" answers. *Note date of comment and specific locations within site. Attach additional sheets if necessary.*

NOTES

Note any recommended improvements or changes: *List any changes in recycled water piping system from previous monitoring report.*
